The Pullman-Moscow Regional Airport Board is soliciting statement of qualifications and experience until 3 p.m., February 10, 2014, from airport engineering/planning consultants to provide engineering services for the airport's capital projects. Future projects include general aviation rehabilitation and expansion, pavement construction, electrical, regulatory compliance, utility extensions and other engineering projects to support ARFF operations and runway and taxiway rehabilitation, installation of taxiway lighting system, charter and cargo area development, and various other airport-related improvements as directed by the Pullman-Moscow Regional Airport for a period of up to three years. Contracts may be awarded for all, part, or none of the projects or services. Selection will be based on an evaluation of factors as required by Federal Aviation Administration Circular 150/5100-14D. For information, contact Tony Bean at (509) 338-3223.
